

润滑垫板 >

LUBRICATED BACKUP BOARD

PCB 高端钻孔材料制造商 PCB HI-TECH Drill Materials Manufacturer

产品用途：

- 用于高档、高精密多层线路板的钻孔

产品特性:

- 特殊的涂层材料具有显著的散热功能，降低钻孔时钻头的温度,减少钻头的损耗；
- 润滑的特性，可润滑钻针，清洁钻针的残屑，提升钻针的排屑效果。
- 提升孔壁质量。

Application:

- Suitable for high precision and multi-layer PCB board drilling CCL cutting and packing

Special Features:

- Special coating make effective heat transfer, lower temperature and reduce wear of drill bit ;
- Lubricate drill bit, clean residual of drill bit and increase ability to removal chips Increase quality of hole's wall.
- Increase surface quality of hole's wall.

技术参数(Technical Data) :

型号 Type	厚度 Thickness (mm)	厚度公差 Thickness Tolerance (mm)	表面硬度 Surface Hardness (Shore-D)	密度 Density (Kg/m ³)	规格 Size (inch)	尺寸公差 Size Tolerance (mm)	外观 Apperance	翘曲度 Warpage
DXE -25-HBL	2.5	±0.15	75±5	880±50	37" x 49" 41" x 49" 43" x 49"	±3	浅蓝色 (允许不规则色差) Wathet blue (Allow some colour difference)	≤0.6% 的对角线 Of diagonal
DXE -20-HBL	2.1		75±5	880±50				

备注：其它规格可定制
Remarks: Other sizes can be customized
