

背钻铝盖板 >

BACKUP DRILLING ALUMINUM ENTRY

PCB 高端钻孔材料制造商 PCB HI-TECH Drill Materials Manufacturer

产品用途：

- 适用于PCB背板的背钻铝盖板

产品特性：

- 采用水性环保复合膜材料，具有良好的绝缘作用及导引效果，保护产品表面的同时，提升背钻孔的孔位精度。
- 精细化要求的铝片，具有良好的接触导电性能，且具最佳的厚度均匀性，从而得到最优的背钻深度CPK。
- 特有的添加剂对钻头具有降温作用，可减少钻针磨损，清洁钻头，提升背钻孔品质的稳定性。

Application:

- Suitable for using in PCB back board drilling

Special Features:

- Use Water-based environmental protection composite membrane materials, with good insulation and guiding effect, protect product's surface and increase back drilling accuracy;
- Sound aluminum sheet with good contact conductivity and the best thickness uniformity makes excellent back drilling CPK;
- Unique additive Material have the effect of lower drill temperature, reduce and clean bit wear, increase stability of back drilling quality.

技术参数(Technical Data)：

型号 Type	厚度 Thickness (mm)	厚度公差 Thickness Tolerance (mm)	规格 Size (inch)	尺寸公差 Size Tolerance (mm)	翘曲度 Warpage
DXE-25-BDA	0.25	± 10 %	37" x 49"	±3	≤0.6% 的对角线 Of diagonal
			41" x 49"		
			43" x 49"		

备注：其他尺寸及厚度可定制。

Remarks: Other size or thickness can be customized.
